

Next Chapter: Game-Based Assessment

A Simulation-based Game Assessment for Modern Hiring

Level Up powered by Agaté.

Anvesana research institute

PEOPLE GROWTH

Gamified Assessment

When an organization needs to assess talent, readiness, or competency in a more objective and scalable way, gamification enables assessment through behavior rather than self-reporting or static testing.

Assessment Creation Process

Phase 1
Theory

- Defining the goal and scope of the test
- Review Best practices and the latest research on the topic of interest
- Develop a clear and comprehensive concept we want to measure
- Create a solid and coherent framework

Phase 2
Items

- Craft questions and tasks for the assessment
- Develop scoring procedures and the feedback mechanism

Phase 3
Validation / Validity

- Evaluate the quality and usefulness of the test
- Ensure the tests are reliable, consistent, and appropriate

Phase 4
Norming

- Establish the standards and benchmark
- Analyze the data to determine the distribution and comparison of the scores

*All processes are guided by expert

The Hiring Reality Today

Most of tests are abstract and disengaging.

Assessment are expensive and time-consuming.

Gen Z & Millennials expect meaningful and relevant hiring experiences.

Research indicates structured assessments outperform interviews in predictive validity, and candidate experience directly impacts employer branding.

Market Trend & Research Backing

Rise of digital-native workforce.

Increased demand for bias-reduction tools.

Shift toward evidence-based HR technology.

Growing focus on predictive validity and fairness.

Research indicates structured assessments outperform interviews in predictive validity, and candidate experience directly impacts employer branding.

Introducing

NEXT CHAPTER

Level Up Game-Based Assessment

is a fun and engaging assessment experience that remains valid and trusted, combining two simulations with personality + cognitive modules, and an enterprise CMS that makes large-scale hiring easy.

Simulation-based decision games

Personality module

Cognitive & Neuro module

Enterprise CMS

Fun and engaging without compromising validity and trust.

Unique Value Proposition

Simulation Games

Cognitive & Neuro Assessment

Personality Narrative-Driven Assessment

3 Assessment Categories

Simulation + Personality + Cognitive

Total **17 Games**

Enterprise CMS

for modular assessments.

Credibility Assets

Expert blueprint, norming, technical manual

Real behavior signals. Enterprise-ready. Scientifically grounded.

Narrative Direction

From Real Life to Career Decisions

Every scenario is designed from real situations faced by candidates in everyday life.

The athlete who must pivot careers

Only a fraction of student athletes turn professional

Reveals: Resilience • Discipline • Long-term commitment

The student who chose the wrong major

80–87% of Indonesian students feel mismatched with their major

Reveals: Adaptability • Career decision patterns

A mental health journey

Mental health is a top priority for Gen Z

Reveals: Pressure management • Emotional regulation

Achieving the first career milestone

Navigating key professional turning points

Reveals: Long-term ambition • Leadership potential

Local & Global Worlds

Assessment That Feels Relatable

Core design principle: Assessments must feel relatable.
Candidates engage more naturally when they see familiar contexts — producing more authentic behavioral signals.

🇮🇩 Local Indonesian Settings

- University campus & athletic training grounds
- Bundaran HI, local minimarkets (Nusamart)
- Everyday student life scenarios
- Indonesian office work dynamics
- Familiar language and cultural context
- Major Indonesian city settings

+

🌍 Global Theme

- Ancient Greece — cognitive & neuro games
- Mythology & epic adventure settings
- International professional scenarios
- Cross-cultural work environments
- Building global adaptability
- Perspectives beyond comfort zones

Personality Assessment

Openness

↓

Intellect &
Inquisitiveness

Conscientiousness

↓

Orderliness
& Self-discipline

Extraversion

↓

Assertiveness
& Sociability

Agreeableness

↓

Empathy & Altruism

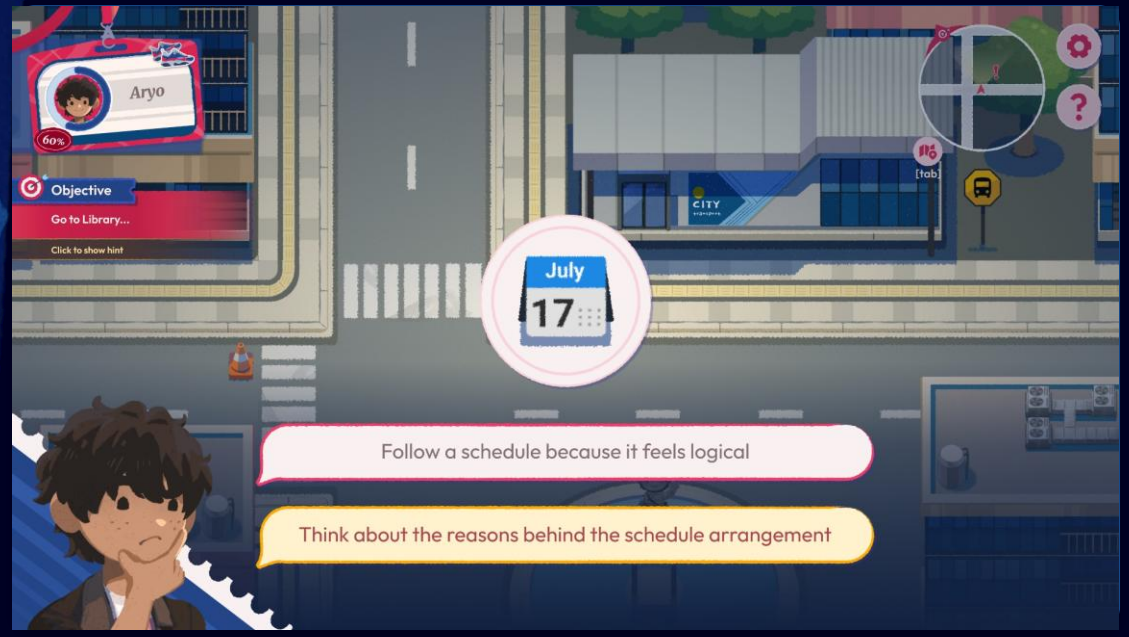

Neuroticism

↓

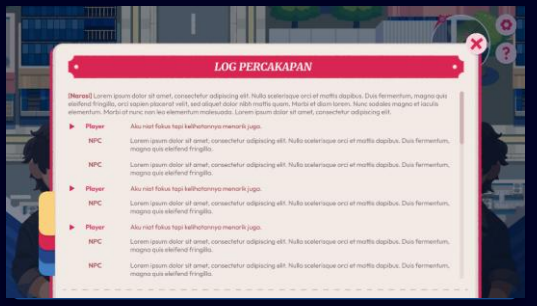

Emotional Stability

Each facet is operationalized through observable behavioral tendencies embedded in gameplay.

Personality Assessment

Foundation

Based on the Big Five personality model, mapped into measurable behavioral tendencies and leadership-relevant competencies.

Format

- Narrative-embedded, forced-choice decisions within an RPG-style scenario flow.
- 32 contextual items (±18–20 minutes).

Output

Comprehensive trait summary:

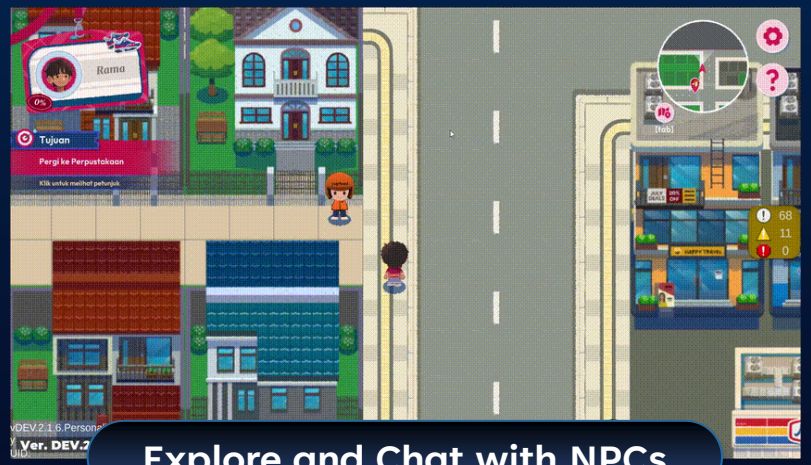

- ✓ Big Five profile
- ✓ Facet-level insights
- ✓ Role-fit & behavioral indicators

Value

More contextual and less biased than traditional self-report tests.

Captures authentic decision patterns through gameplay.

Personality Assessment **Features**

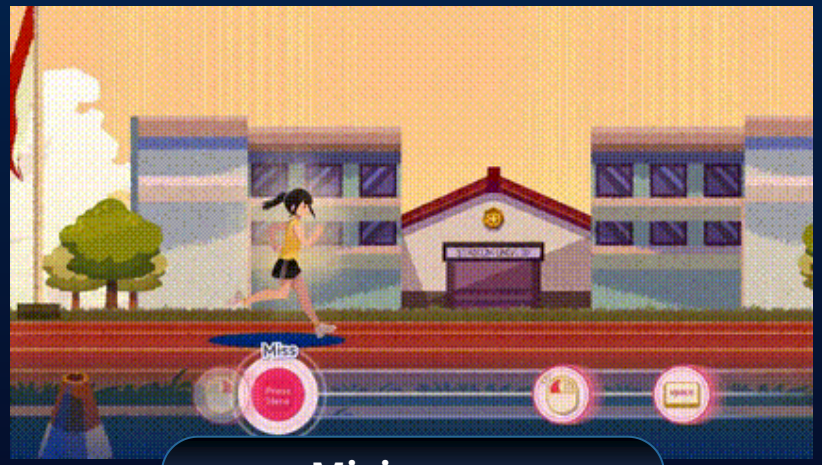

Explore and Chat with NPCs

Decision-making Visual Novel

Area Map

Minigames

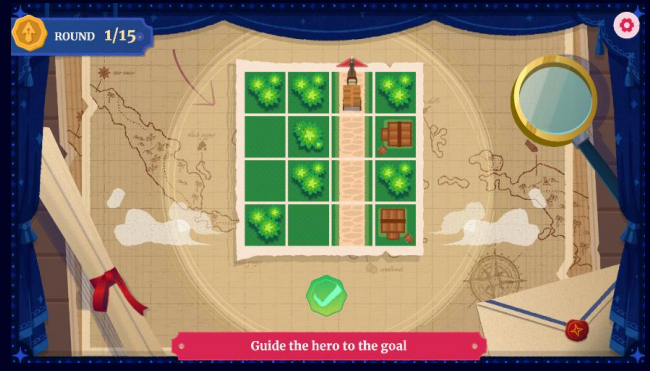

Cognitive Assessment

Measures

Working Memory, Inhibitory Control, Cognitive Flexibility, Planning Ability, Problem-solving, Decision-making

Format

7 mini games, 10–30 minutes.

Output

Cognitive Index, accuracy & speed metrics.

Value

Large screening & learning agility benchmark. anti-cheating logic, automatic scoring.

Cognitive Assessment **Games**

1

Objective Shooter

The hero first touches great power and learns that speed without control is dangerous.

Measures: Computational ability (forward counting), speed, and precision by clicking numbers in ascending order.

2

Reverse Retention

Before gaining wisdom, the hero must prove focus and patience. Wisdom is limited and must be used carefully.

Measures: Working memory (backward recall) by remembering a sequence and recalling it in reverse order.

3

Odd One Out

The hero can see small differences that determine big outcomes. Hidden flaws can be fatal.

Measures: Analytical ability (pattern recognition) by identifying the object that differs based on a rule.

4

Mallet Math

As crisis spreads, the hero must make difficult decisions to save others. It is no longer about self-growth, but responsibility.

Measures: Arithmetic computation, planning, and problem-solving by adjusting number tiles to reach a target value.

Cognitive Assessment **Games**

5

Object Turn

Guided by history and leadership, the hero must choose the right path. A wrong direction impacts many lives.

Measures: Visual perception and spatial reasoning by determining the correct route to reach a goal.

6

Match Blast

Alone at the source of chaos, the hero relies only on accumulated lessons. This is the final independent test before confrontation.

Measures: Pattern recognition, planning, and logical problem-solving through strategic block manipulation.

7

Speed Sorting

The ultimate confrontation represents power without wisdom. The hero succeeds not because of strength, but readiness and balance.

Measures: Analytical categorization and cognitive agility by sorting objects quickly and accurately under pressure.

Neuroscience-based mini-games

Core Games
& Measured Aspects

Balloon Game

→ Risk-taking & Risk tolerance
→ Decision-making
→ Learning ability

Tower Game

→ Planning ability
→ Problem-solving

Keypress Game

→ Motivation
→ Effort
→ Processing speed

Hard or Easy Task Game

→ Effort allocation
→ Decision-making under uncertainty
→ Motivation

Neuroscience-based mini-games

Core Games
& Measured Aspects

Lengths Game

→ Attention to detail
→ Quantitative reasoning
→ Visual processing speed

Cards Game

→ Decision-making & reasoning
→ Risk behavior
→ Learning adaptability

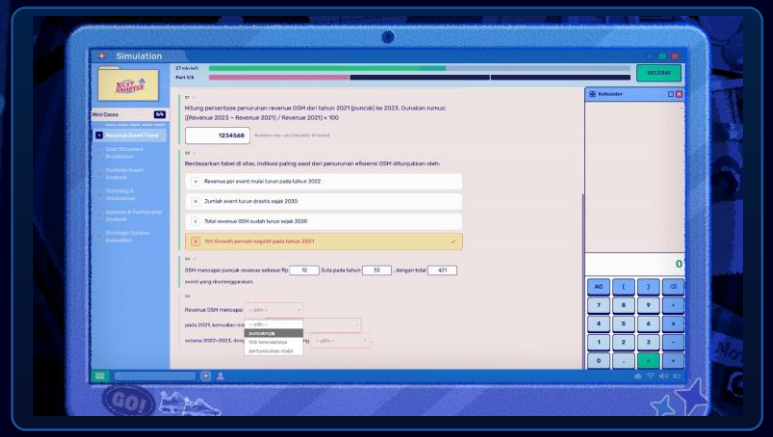

Faces Game

→ Emotional recognition
→ Emotional intelligence
→ Empathy

Simulation Assessment

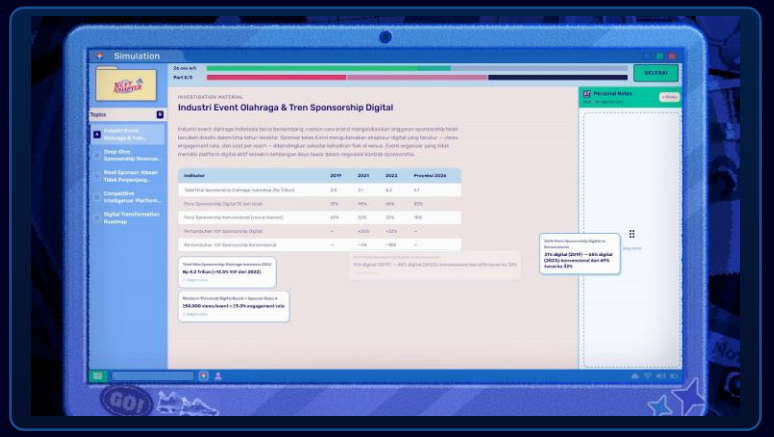

Game 1

Everyday Business & Task Operation

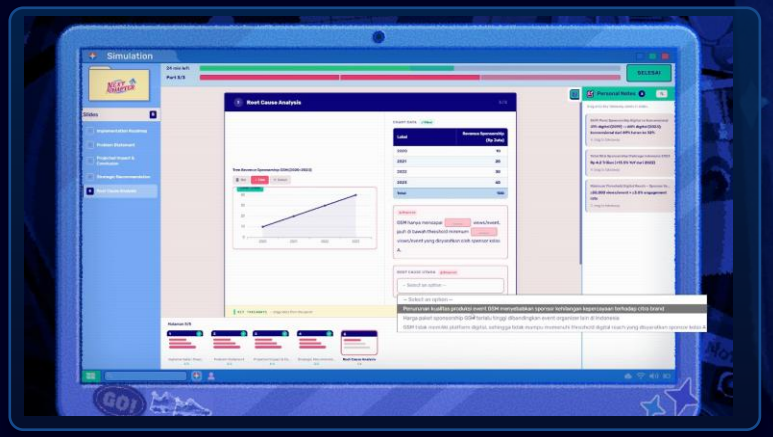

Phase 1: **Case Analysis**

Read and answer mini-cases

Phase 2: **Investigation**

Explore materials and collect key-data

Phase 3: **Reporting**

Build a business report slides from your findings

Measures:

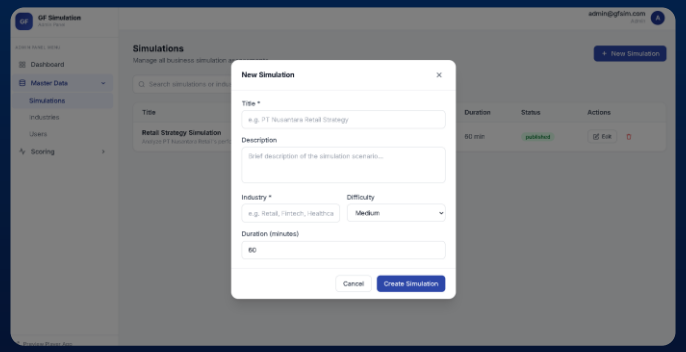

- **Integrity,**
- **prioritization,**
- **accuracy under stress.**

Simulation Assessment

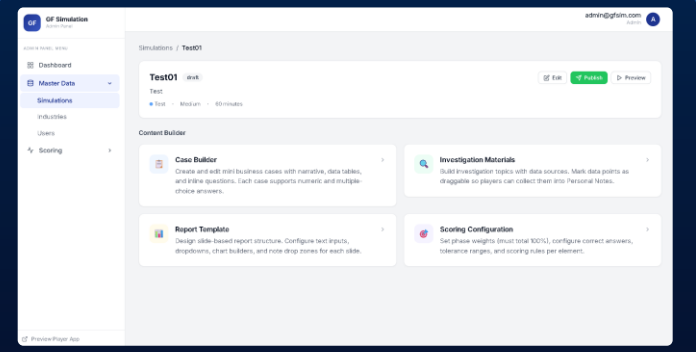

Game 1

Everyday Business & Task Operation

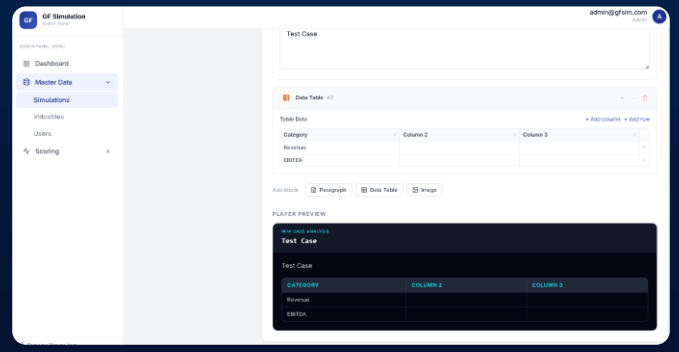

Materials is **customizable** for your companies and specific industries through our CMS

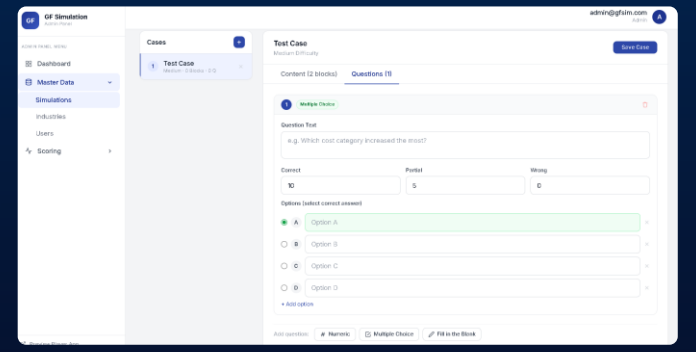

Create new Simulation

Business Case Data Builder

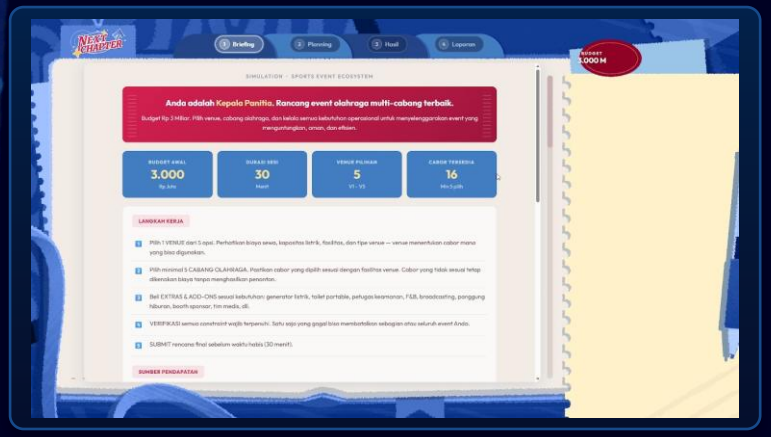

Business Case Question Builder

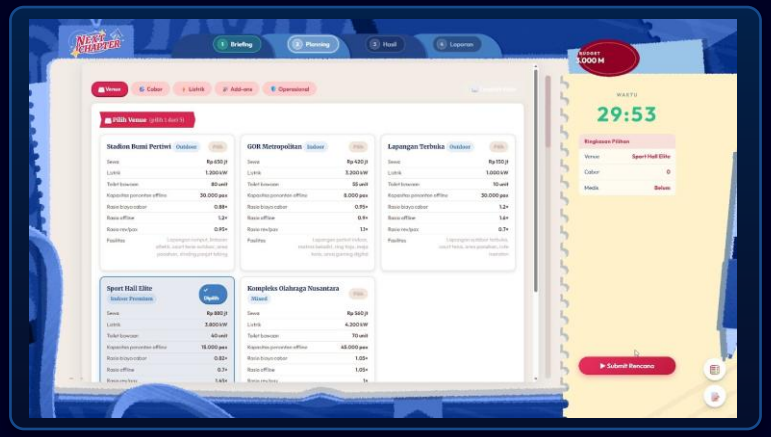

Simulation Assessment

Game 2

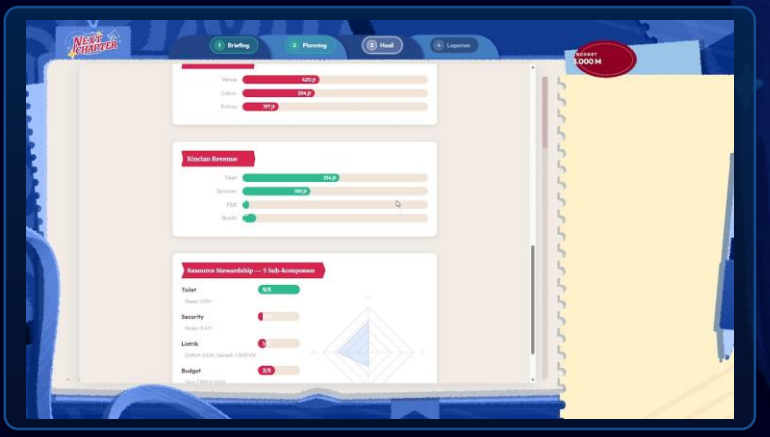

Event Operation Simulation

Tutorial & Briefing

Budget Planning with Timer

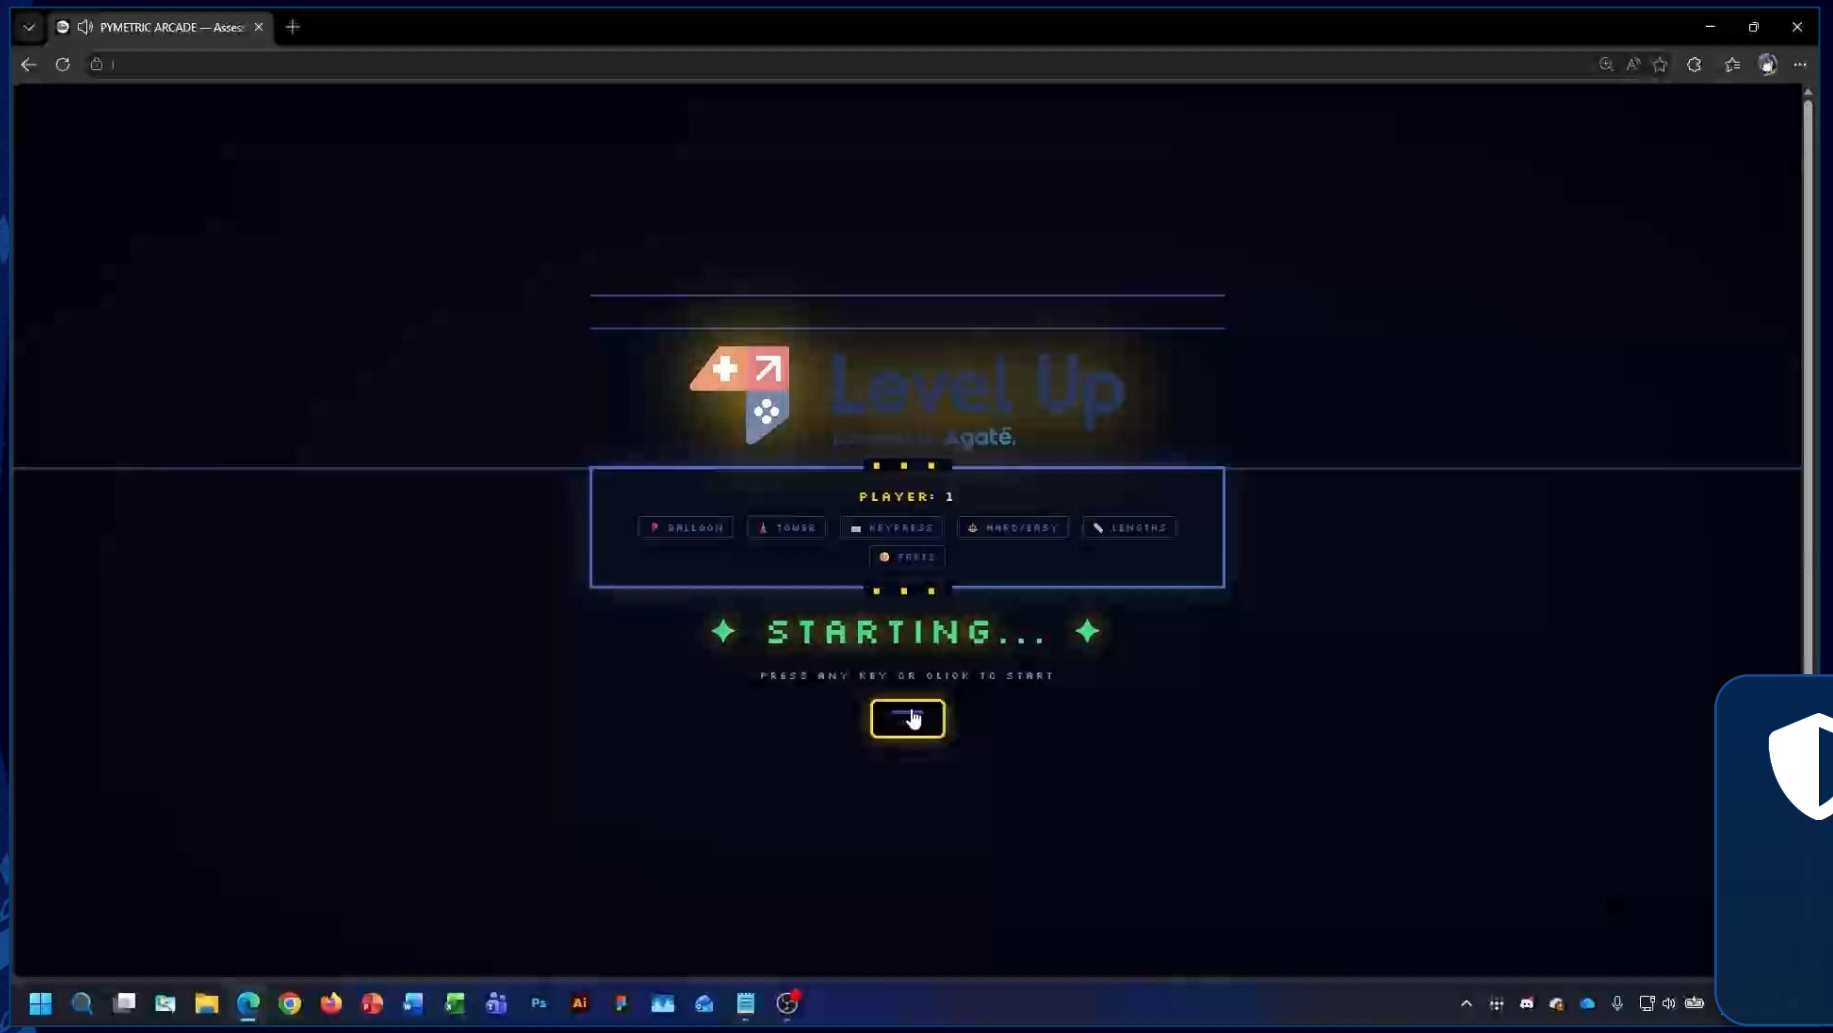

Result and Report Generation

Measures:

- Integrity,
- prioritization,
- accuracy under stress.

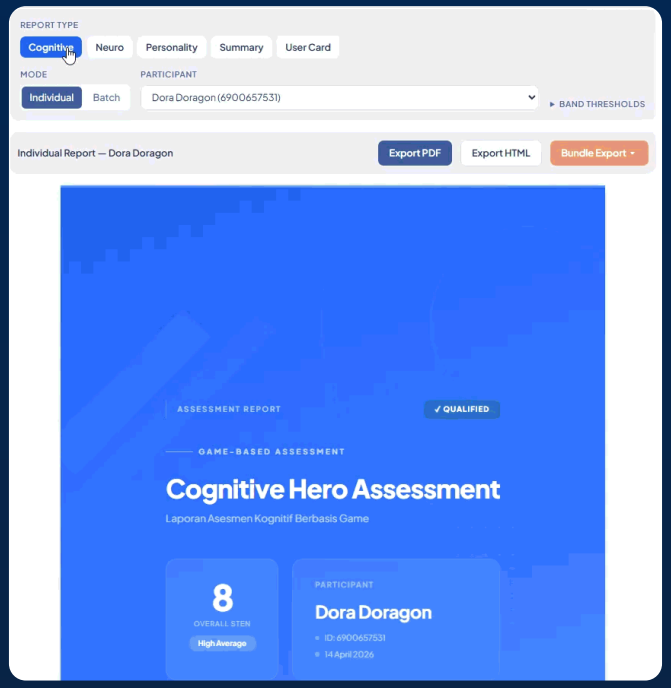

Enterprise-Grade Features

Proctoring & Anti-Cheat

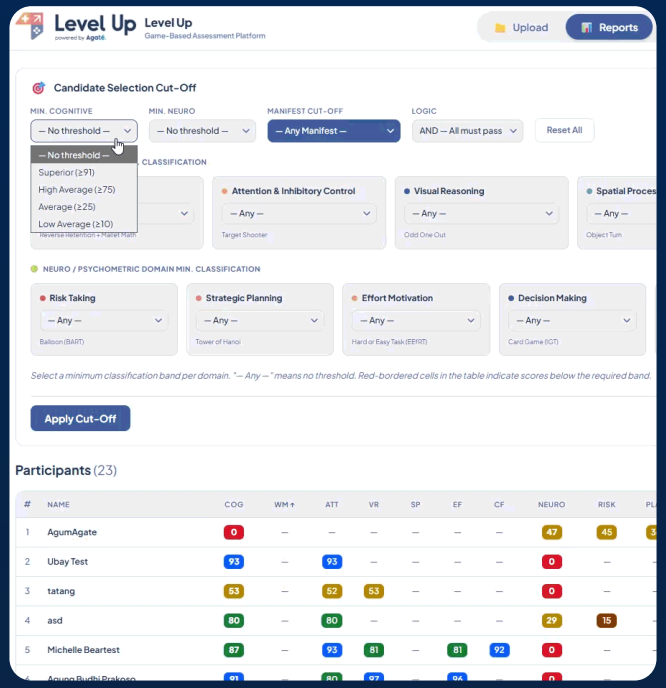

Built-in anti-cheating logic with automatic scoring. **No manual intervention needed.**

Enterprise-Grade Features

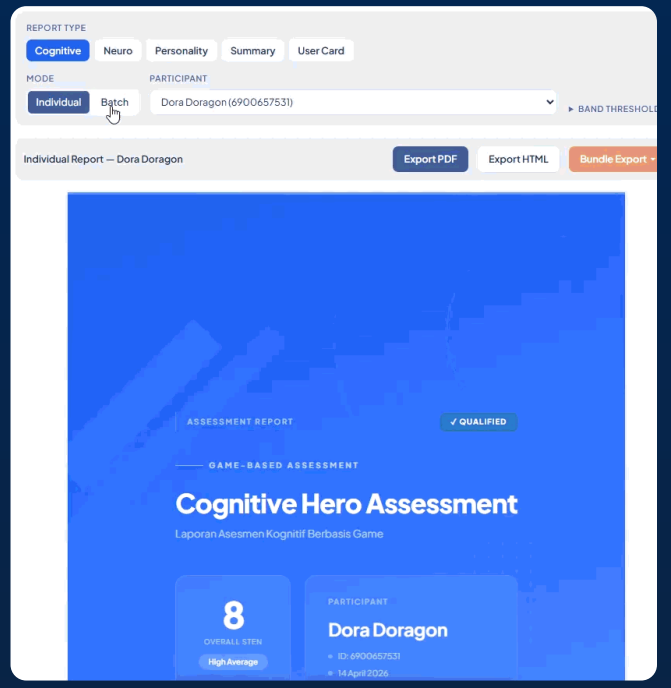

Auto Report Generation

Executive summary, job fit %, core competencies, and final recommendation — **fully automated.**

Cut-off Score System

Set minimum levels per competency. Candidates below threshold are automatically flagged.

Bulk Report Download

Download individual or batch reports at once.
Built for high-volume hiring.

Enterprise-Grade Features

Email Blast & Reminders

Send invitations and automated reminders to hundreds of candidates directly from the CMS.

Bulk Participant Upload

Upload candidate lists via CSV. Saves HR time for campus and MT recruitment drives.

Real-time Status Tracking

Monitor every candidate's progress — started, completed, or not yet opened.

Role-based Access Control

Tiered access for HR, recruiters, and managers. Candidate data stays secure.

Modular Assessment & Enterprise CMS

Modular Assessment

Choose What You Need. Combine What Matters.

Organizations can deploy:

- A single assessment module
- A combination of two categories
- Or the complete 3-in-1 assessment suite

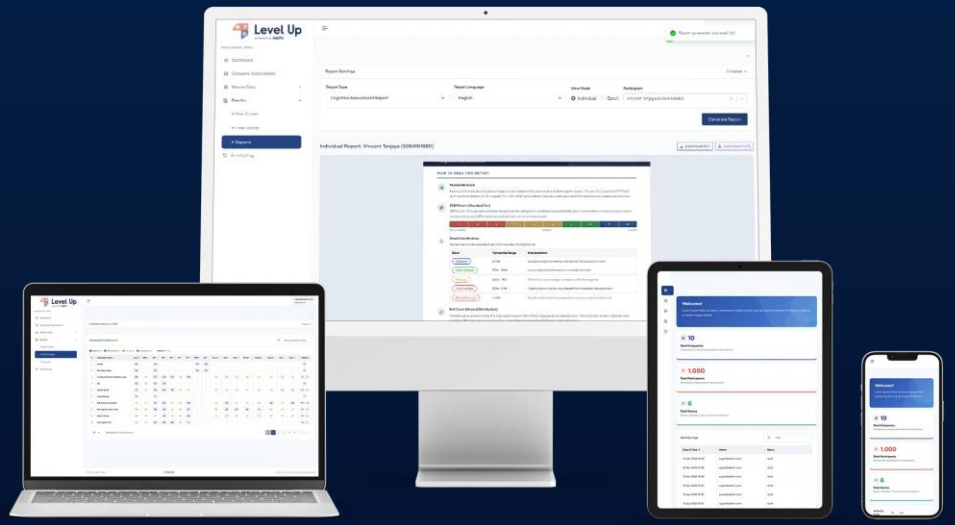

Each module works independently or seamlessly integrates within our Enterprise CMS.

Built for Flexibility

- Modular configuration
- Custom role-based mapping
- Scalable for enterprise deployment
- Scientifically grounded and data-driven

Enterprise CMS

Fun and engaging—without compromising validity and trust.

- Bulk participant upload
- Email blast & reminders
- Status tracking
- Individual & batch reports
- Role-based access & security

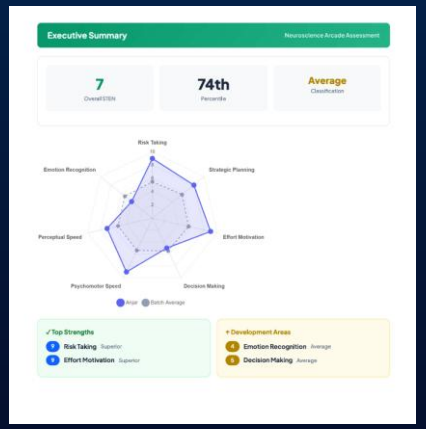

Assessment Report

The report provides a comprehensive evaluation, including:

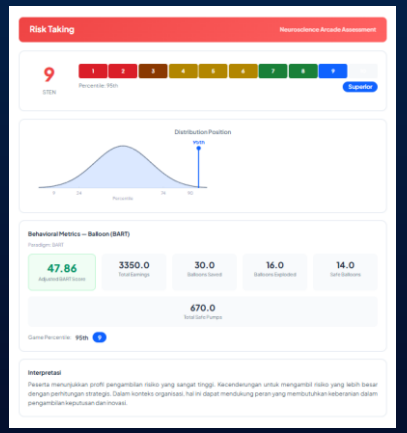

- Executive Summary & Job Fit Percentage
- Core Competency Assessment
- Sub-Competency Analysis
- Strengths & Development Areas
- Final Recommendation

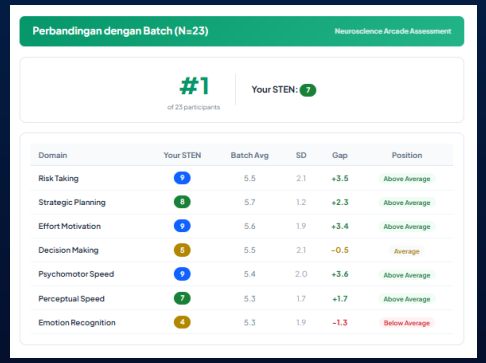

Support objective decision-making and talent alignment with the target position.

Individual Report

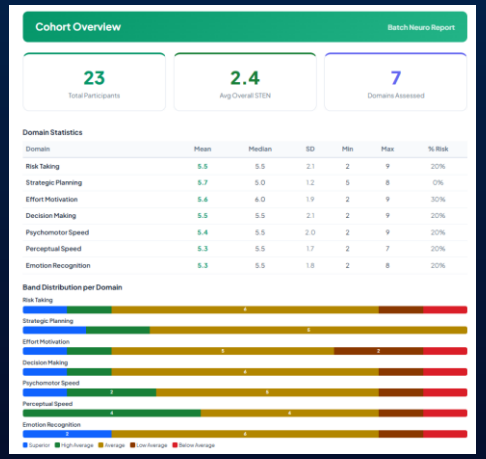

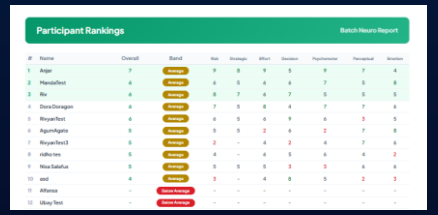

Batch Report

Interactive Report

Business Impact

What Academic Studies Shows:

🧠 Validated Cognitive Measurement

Game-based assessments show convergent validity with traditional cognitive tests.

⚖️ Fair & Bias-Reduced Evaluation

Standardized scoring reduces subjectivity and shows minimal demographic performance gaps.

📈 Positive Candidate Experience

Applicants report higher engagement and perceived fairness vs. traditional tests.

📊 Stronger Performance Signals

Simulation-based assessments better capture real decision-making and workplace-relevant skills.

Pricing Structure

Pilot (>30 users)	Basic (>250 users)	Bronze (>1.000 users)	Silver (>10.000 users)	Gold (>30.000 users)
Let’s Talk!	Let’s Talk!	Let’s Talk!	Let’s Talk!	Let’s Talk!

Special for Early Access adopters, get **30% OFF**

Affordable assessment per user cost, starts from IDR 49,999 - 300,000
