

DEUS Game-Based Assessment

Pain Points

Candidates **study how to "pass" personality tests**, so results reflect preparation rather than character

Abstract cognitive tests fail to **show how someone thinks under pressure**

Many candidates drop out of **long, boring assessments** before completion

HR teams spend days **scoring and compiling results manually**

WHAT'S OUR ASSESSMENT FOR

Annual MT Recruitment

High volume, need to shortlist quickly and fairly.
Cognitive + Neuro modules for first-pass screening, Simulation for finalist round.

Competency Mapping

Match individual profiles against role competency frameworks and identify gaps and build targeted development plans.

Leadership Identification Programs

Internal talent for supervisor and manager pipeline.
Neuro module's risk, motivation, and EQ data is uniquely suited here.

Internal Talent Mapping

Visualize capability distribution across the organization
Cognitive + Personality data maps strengths, gaps, and hidden high-potentials across teams and divisions.

Campus Recruitment

Large applicant pools across universities.
Personality + Cognitive gives a clear differentiated ranking

Talent & Development Programs

Use assessment data to prioritize L&D investment, personalized paths for HiPos and succession candidates.

Three Positioning Pillars

Real behavior signals

Candidates cannot fake how they play. Every choice and hesitation becomes data.

Scientifically grounded

Built on Big Five, neuroscience, and cognitive psychology frameworks.

Enterprise-ready

Modular, scalable, and managed through a CMS for high-volume hiring.

Module Overview

Personality

Big Five, RPG narrative

Cognitive

7 games covering memory, logic, and planning

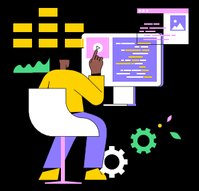

Neuro

6 games measuring motivation, risk, and EQ

Simulation

2 customizable business scenarios

Enterprise CMS

Manage all candidates in one platform

PERSONALITY ASSESSMENT

- **Digital situational judgment profiling**
- Measures **32 personality subtraits**, **24 competency traits**, customized competencies
- **Scientifically grounded**
  - Inspired by Big Five (OCEAN) Personality Traits
  - Universal Competency Framework

What Makes DEUS Discover Different?

RAPID Profiling

Comprehensive candidate profiling results can be delivered within the same day or next day

CUSTOM Competencies

Competency measures can be tailored to organizational needs

MASS SCALE Summary

Structured digital summary dashboards to make large-scale results easy to review, compare and monitor across groups

END-TO-END Usage

Not only for recruitment but also for employee development, promotion readiness, training needs analysis, leadership mapping

Customizable Competencies

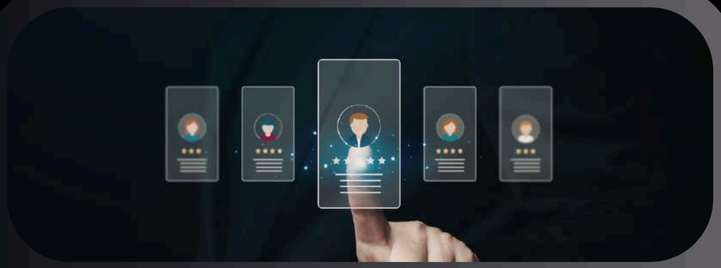

Result indicators that speak your organization’s language:

The scores and indicators that your HR team sees on every report is framed around your competency framework

Competencies figured to your role requirements:

Competencies being assessed is mapped directly to what success looks like in that specific role (e.g. different competencies for Finance, Sales, Marketing)

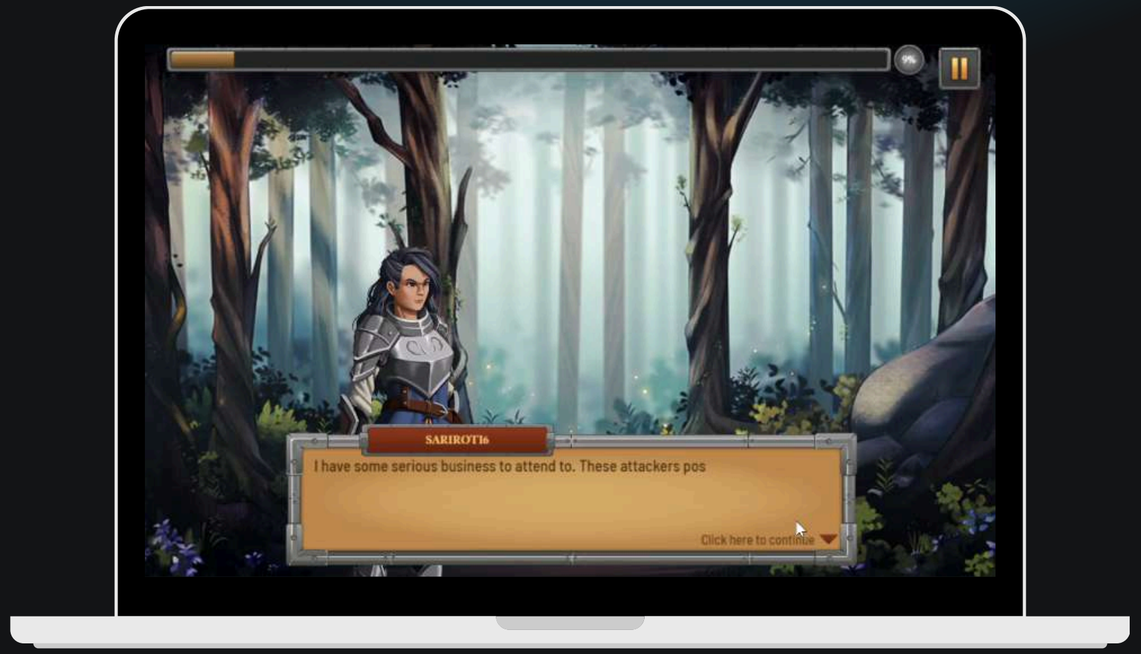

Candidate scores relevant to your context:

Where relevant, say for the simulation, personality - the scenarios, industry context and business language reflect your company’s world so you’re seeing their potential of performing in situations that actually resemble the job

COGNITIVE ASSESSMENT

Objective Shooter

Processing speed & precision

Reverse Retention

Working memory

Odd One Out

Pattern recognition

Mallet Math

Arithmetic & problem solving

Object Turn

Spatial reasoning

Match Blast

Logical reasoning

Speed Sorting

Cognitive agility

What Traditional Tests Miss

- Answers can be coached or memorized
- No insight into speed or consistency
- Difficult to scale for large hiring volumes

What This Gives You

- Accuracy and speed metrics in real time
- Learning agility benchmark
- Unlimited scalability

COGNITIVE ASSESSMENT

NEUROSCIENCE ASSESSMENT

Six neuroscience based mini games capturing motivation, risk tolerance, effort allocation, and emotional intelligence through unconscious behavior.

Balloon Game
Risk taking & learning ability

Tower Game
Planning & problem solving

Keypress Game
Motivation & processing speed

Hard or Easy Task
Effort Allocation
Decision Making

Lengths Game
Attention to detail

Faces Game
EQ, empathy & emotional recognition

What This Gives You

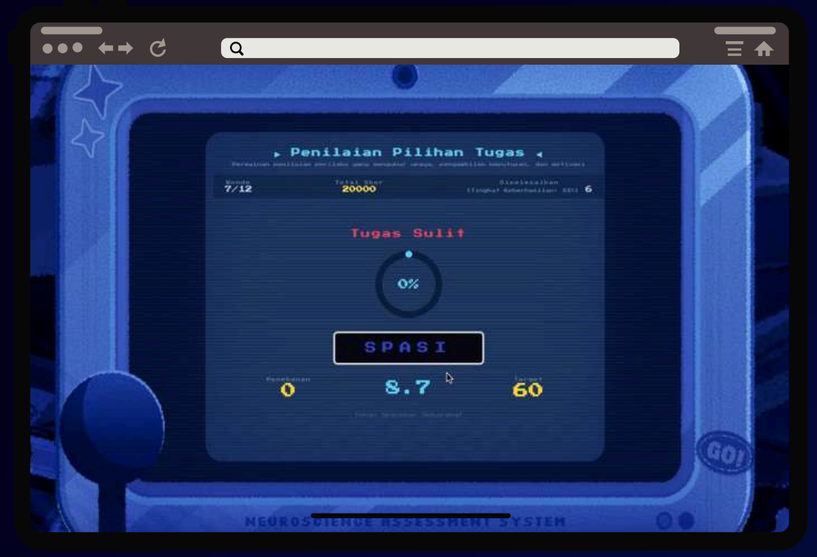

- Behavioral data from actual actions
- Early visibility into risk profile
- Emotional recognition insights for leadership and service roles

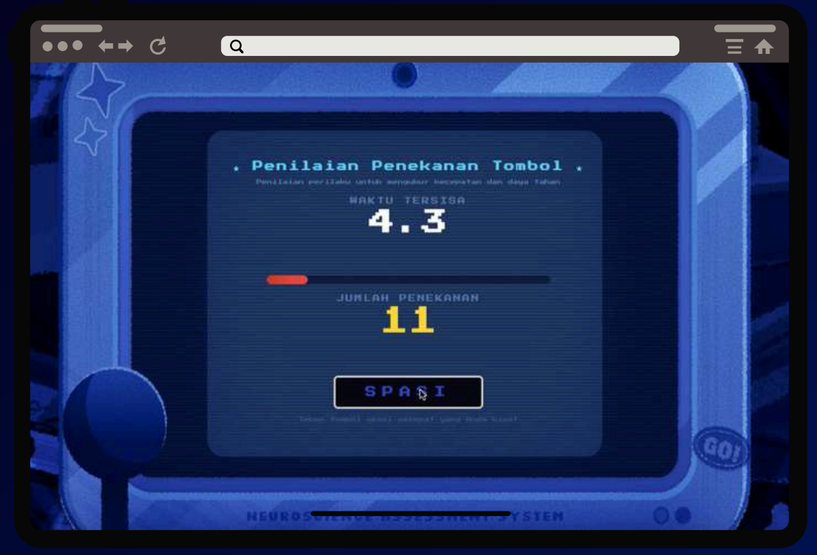

What Interviews Miss

- Motivation is often misjudged
- Risk appetite appears too late
- EQ is difficult to assess fairly

NEUROSCIENCE ASSESSMENT

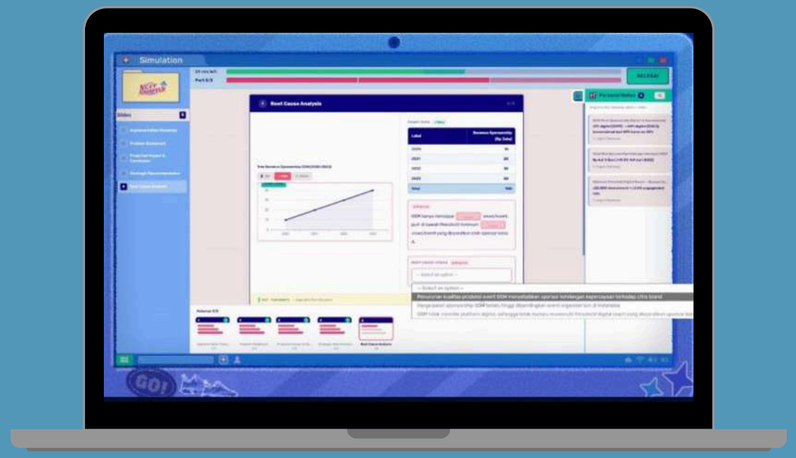

SIMULATION ASSESSMENT (FULLY CUSTOMIZABLE)

Real business simulations covering case analysis, investigation, reporting, and budget allocation. Fully customizable through the CMS.

GAME 1: BUSINESS OPERATIONS

Review cases, **investigate information, and create a business report.**
Measures **judgment, accuracy,** and **analytical communication**.

What Case Interviews Miss

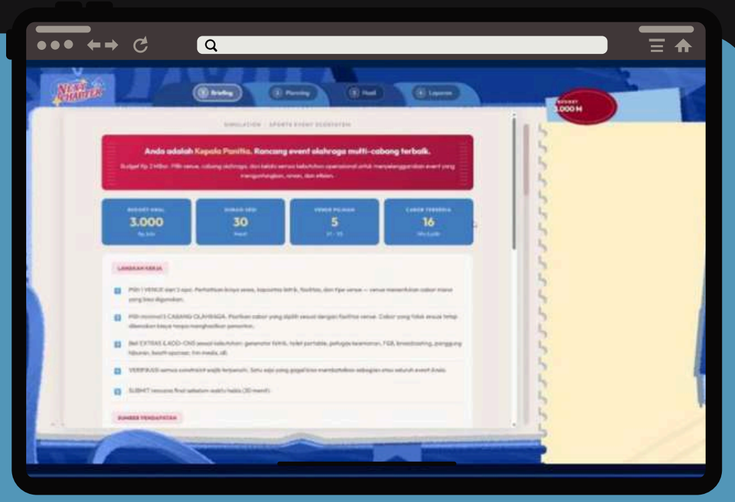

- Candidates can memorize frameworks
- Assessment centers are costly and difficult to scale
- Generic cases lack company relevance

What This Gives You

- Candidates are tested based on your industry context
- Prioritization, accuracy, analysis under real time pressure
- Consistent and scalable

GAME 2: EVENT OPERATIONS

Allocate budget under a live timer and generate a report.
Measures **prioritization, resource allocation,** and **decision speed**.

SIMULATION ASSESSMENT

ASPECTS MEASURED

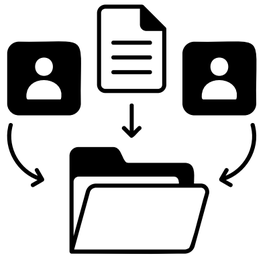

Analytical Thinking

- Analyze complex business data.
- Identify patterns, trends, and root causes.
- Draw logical conclusions from available information.
- Compare multiple variables and make evidence-based decisions.

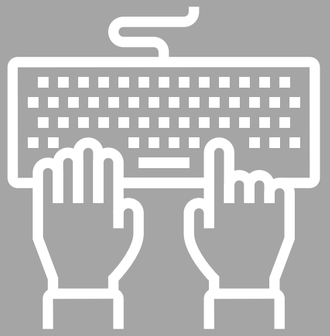

Financial & Business Acumen

- Perform financial calculations accurately.
- Interpret financial data.
- Integrate financial information into business decisions.
- Evaluate business performance and ROI.

Diagnostic Information Gathering

- Identify the most relevant evidence.
- Distinguish important information from less useful information.
- Investigate business issues systematically.
- Make decisions based on the strongest supporting evidence.

Written Synthesis

- Organize findings into a logical report.
- Structure business recommendations clearly.
- Present a coherent flow from problem identification to conclusion.
- Communicate complex ideas effectively in writing.

REPORT TYPES

INDIVIDUAL REPORT

- Executive summary
- Overall score + percentile
- Core competency breakdown
- Sub-competency analysis
- Strengths and development areas
- Final hire recommendation with narrative

Who it's for:
The hiring manager making a go/no-go call on a specific candidate

Format:
Exportable PDF or shareable live link

BATCH / COHORT REPORT

- Cohort overview
- Domain averages across all participants
- Full ranked candidate list
- Cut-off flag indicators
- Individual position summaries per role track

Who it's for:
HR team running MT recruitment, campus drives, or leadership assessments at volume

Format:
Downloadable as a full batch PDF

INTERACTIVE LIVE REPORT

- Live filterable dashboard
- Sort by role track, module, score band, or cut-off status
- Click any candidate to open their full profile

Who it's for:
Hiring committees, C-suite talent reviews, panel discussions

Format:
Shareable link

CLASSIFICATION

A **Excellent**

Percentile 86% - 21 participants

PER COMPETENCY

AT	25
FA	25
DIG	19
WS	25

The participant demonstrates outstanding capability across all four dimensions of this business case simulation. Analytical reasoning is sharp and inference-based, financial calculations remain accurate even when data must be self-gathered, evidence selection consistently lands on the most diagnostic choices, and the final report flows coherently from problem framing to conclusion. This profile is consistent with a candidate ready to handle Management Trainee responsibilities with high analytical demands.

THE PLATFORM BEHIND EVERYTHING

The Enterprise CMS is what turns individual assessments into an actual hiring workflow. Bulk invite, real-time tracking, automated reports, cut-off flagging, all in one place, accessible to your whole team with role-based permissions.

Modular Deployment

Organizations can deploy a single module, combine **two**, or run the **complete** suite. **Each module works independently** or i**ntegrates seamlessly** within the platform. Start with what you need. Scale as you see results

1. **Bulk participant upload via CSV**
   no manual entry for MT or campus recruitment drives
2. **Email blast and automated reminders**
   send invitations and follow-ups to hundreds of candidates directly from the platform
3. **Real-time status tracking**
   see at a glance who has started, completed, or not yet opened their assessment
4. **Cut-off score system**
   Set minimum competency thresholds; candidates below are automatically flagged, no manual review needed
5. **Auto report generation**
   Reports generate the moment a candidate finishes; export individual PDF or full batch in one click
6. **Role-based access control**
   Tiered permissions for HR, recruiters, and managers; candidate data stays secure and appropriately visible

FOUR CREDIBILITY PILLARS

Built on established science

Big Five personality model, neuroscience behavioral paradigms and classical **cognitive** assessment frameworks.

Expert-guided creation process

4-phase development:
Theory → Item Development → Validation → Norming
All guided by **psychometricians** and I/O psychology researchers.

Validated against traditional tools

Game-based assessments show convergent **validity with traditional cognitive tests**.

Normed on Indonesian population

Benchmarks and score distributions derived from local data, not imported Western norms.

THE BUSINESS IMPACT

Better Hire Quality

Behavioral and cognitive data predicts job performance better than interviews and resumes alone.

Faster Hiring Cycles

Automated scoring and instant reports mean decisions that previously took days happen the same day.

Stronger Employer Branding

Candidates who experience a well-designed, engaging assessment perceive the company as modern, innovative, and talent-serious.

Scalable High-Volume Screening

Run MT and campus assessments at full volume without proportionally increasing HR workload or per-candidate assessment cost.

ROI Framing

One prevented bad hire at manager level typically recovers 5–10x the annual cost of a full assessment program.

HOW THE ASSESSMENT PROCESS WORKS

1. Invitation

Bulk upload candidates via CSV and send branded invitations automatically.

2. Secure Start

Device checks and anti-cheat logic initialize instantly. No downloads required.

3. Immersive Assessment

Candidates complete personality RPGs, cognitive games, or business simulations.

4. Instant Insights

Scores and interactive reports are generated immediately with zero manual grading.

KEY IMPLEMENTATION BENEFITS

Anti-Cheat Proctoring

Built-in proctoring and standardized scoring eliminate bias and reduce cheating risks.

Frictionless Experience

Mobile and desktop browser access with no app installation required.

Zero Manual Overhead

Automated scoring, ranking, and reporting with no manual intervention.

Flexible Deployment

Deploy standalone modules or combine multiple assessments for deeper talent evaluation.

PRODUCT PRICING

Bundle	Starter (≤250 users)	Growth (251–10,000 users)
1 Item	99,000	69,000
2 Items	169,000	119,000
3 Items	229,000	159,000
4 Items (Full Suite)	279,000	199,000

Ketentuan Pembelian

- *Di bawah 35 users: wajib mengambil 4 item*
- *Di atas 35 users: dapat memilih 1–3 item sesuai kebutuhan.*
- *Minimum pembelian Rp10 juta.*

*Price per candidate in IDR

SMOOTH ADOPTION

Free trial available

Try the assessment yourself or with a small sample group before committing to anything

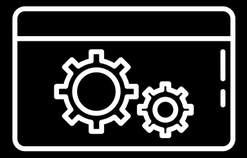

Prove the fit before scaling company-wide

Pilot with one division, one role, or one small batch.

No long-term contract required

Month-to-month or per-batch usage, scale up only when you're ready

Combine modules flexibly

Can start with just 1 module (e.g. Cognitive only) and add more later as needed

Success Story

Telkom Group

1. **Worked with Telkom Indonesia and 6 of their subsidiary companies for 2 years in a row**
2. **Worked with us in hiring 1000+ candidates for Management Trainee recruitment program**
3. **30+ provinces across Indonesia all in one time**
4. **Results delivered within 1 day**
4. **Excellent reviews and satisfaction score from Telkom and from the participants**

"Bagus sekali idenya, saya pertama kali menjalankan psikotest dengan metode seperti ini dan tidak terasa seperti psikotest. Sangat Menyenangkan!"

"Tidak pernah disangka tes psikologi dapat dilakukan dengan cara yang sangat menyenangkan"

"Semoga lebih banyak tes-tes gamifikasi yang luar biasa ke depan"

Group photo at Telkom Indonesia Graha Merah Putih, Bandung

"Senang sekali bisa bekerja sama dengan tim DEUS dalam penyiapan seleksi untuk karyawan Telkom Group. Kami sangat terbantu dengan profesionalitas sepanjang persiapan hingga proses akhirnya. Semoga kerja sama kami tetap berjalan dengan baik."
- Ibu Lina, Telkom Group Selection
